Dear Dan:

Enclosed is our proposal covering the speed conversion kit and timer for the K rack which you requested. We are sorry not to have gotten this proposal to you earlier.

25X1A

This proposal covers only the development of the time signal generator unit and not the production costs. We estimate these units will cost approximately \$ 1,600.00 to produce and can be delivered in about four months. A more detailed cost estimate can be furnished when the development work is completed.

The delivery schedule proposed is based on the availability of the commercial timer from the Times Facsimile Corporation. If this timer is available in stock, we can get delivery in two weeks. If we have to wait for a manufacturing run, delivery may be sixty to ninety days.

We would propose to retain the new master tapes to be made under this proposal until completion of the contract as we have retained the present ones.

We would appreciate your early approval of this proposal.

Sincerely,

A handwritten signature in cursive script, appearing to read "Dean".

Dean
